DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

- I. Elect one polymer resin material from the list below:
 - (i) Meta-acrylic-based resins, claim 22
 - (ii) Styrene-based resins, claim 22
 - (iii) Cycloolefin-based resins, claim 22
 - (iv) Polyester resins, claim 22
 - (v) Polycarbonate resins, claim 22
 - (vi) Polydiallyldimethylammonium resin, claim 22
 - (vii) Crosslinked polyallylamine polyacrylic resin, claim 22
 - (viii) Admixtures of the above resins, claim 22

- II. Elect one type of fine particle from the list below:
 - (i) Inorganic material, claim 23
 - (ii) Organic material, claim 24

Art Unit: 1641

In the event that "Inorganic material" (i) is elected, the following sub-species election must also be made (elect one material from the list below):

- (a) MgF_2 , claim 23
- (b) SiO_2 , claim 23
- (c) AlF_3 , claim 23
- (d) CaF_2 , claim 23
- (e) LiF , claim 23
- (f) NaF , claim 23
- (g) ThF_4 , claim 23
- (h) Admixtures of the above, claim 23

In the event that "Organic material" (ii) is elected, the following sub-species election must also be made (elect one material from the list below):

- (a) Crosslinked acrylic, claim 24
- (b) Uncrosslinked acrylic, claim 24
- (c) Crosslinked polystyrene, claim 24
- (d) Uncrosslinked polystyrene, claim 24
- (e) Monodisperse polymethyl methacrylate, claim 24
- (f) Admixtures of the above, claim 24

The species are independent or distinct because they each have distinct structural and chemical properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 12-21 are generic and claims 22-24 are subject to species election.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1641

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leon Y. Lum whose telephone number is (571) 272-2878. The examiner can normally be reached on weekdays from 8:00am-5:00pm.
